### **Most Weaponized Vulnerabilities of 2022 and 5 Key Risks: Report**

The Qualys 2023 TruRisk Research Report discusses the five most exploited vulnerabilities of calendar year 2022, and the five key 'Risk Facts' that security teams need to consider.

To compile the report, the Qualys Threat Research Unit analyzed more than 13 billion events to gain insight into the vulnerabilities found on devices, the security of web apps, and the misconfiguration of on-premise devices.

### **Preventing Cybercrime Writeup**

Constantly evolving technology has made our business and social practices more efficient and personal. While communicating with friends and family and accessing information easily makes life more enjoyable, this freedom also makes Internet users more vulnerable to cybercriminals. Cybercriminals exploit the Internet through fraud, unsolicited bulk emails (SPAM), phishing scams, and child exploitation.
